Biosynthetic Technologies Product Line

TRADENAME	CHEMISTRY
BT4	Low viscosity estolide for metalworking and lubricants
BT22	Medium viscosity estolide for metalworking and lubricants
BT22LP	Medium viscosity estolide with low pour point for metalworking and lubricants
BT75	High viscosity estolide for metalworking and lubricants
BT75LP	High viscosity estolide with low pour point for metalworking and lubricants
BT PRA30	Polycinoleic acid (AV = 30) to provide enhanced lubricity in metalworking
BT PRA50	Polycinoleic acid (AV = 50) to provide lubricity and surfactancy in metalworking
BT PRA100	Polycinoleic acid (AV = 30) to provide surfactancy in metalworking
BT TMPTO	Trimethylol propane trioleate for metalworking
BT NDO	Neopentyl glycol dioleate for metalworking
BT PEO 1	Pentaerythritol oleate for metalworking
BT PEO 2	Pentaerythritol oleate (viscosity = 250 cSt) for metalworking
BT DES	Diethyl sebacate (aka = dioctyl sebacate) for coolants/antifreeze
BT BHI	Bis-hydroxy imidazoline for emulsification and rust/corrosion inhibition
ENVIROCAS	Line of ethoxylated castor oil surfactants for use in various industrial systems
